

## Online Key

After start ARCHICAD, in *EPTAR Solution* menu choose Registration in the *ArchiTerraPlus* button. Then follow the steps for Online Key Validation like in the pictures below.

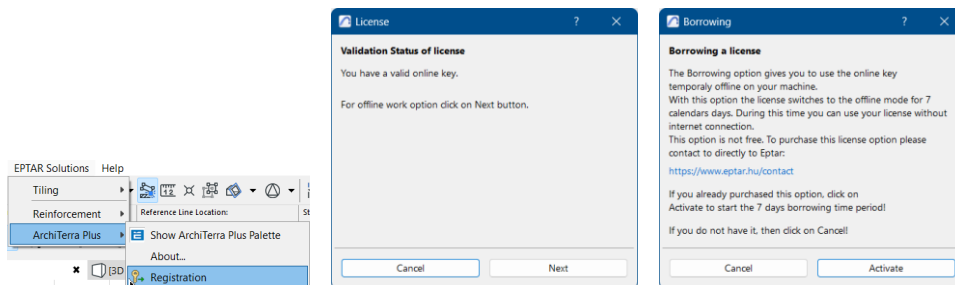

## Borrowing the license

We present you a new option for online key. This option is not free, it is possible to by for each licenses what you have. Buying it for one license it will work only with this license.

It should be ordered in email directly from Eptar: [info@eptar.hu](mailto:info@eptar.hu)

How it's working:

- after you registered an ArchiTerraPlus online key open a Registration again
- click on "Next" button and if you receive a message "Congratulation!", your license is switch succesfully to "offline" mode for 7 calendar days, that means you can use your license without online connection during a week. After the time is running out, the license switches back to online mode. To repeat the borrowing process you need again the online connection, and start the action as descibed above.

If you buy this option and it does not work, please contact to the ÉPTÁR support: [info@eptar.hu](mailto:info@eptar.hu)
