

# EPTAR TILING

We're looking for partners who share our vision and passion in making Archicad better and to work together to extend the customer circle.

Apply online and start recommending Eptar Archicad solutions to your clients.

**Your customers can now create stunning bathroom and kitchen designs with this tool. A very user-friendly solution that will allow architects to create unique tile designs and define the necessary quantities.**

Tiling is a wall and floor tiling application for Archicad. Free texture, tile size and listing name definition options are enabled.

Tiling handles wall and floor polygons both and supports door and window edges.

Individual and complete row editing is possible in only one step. Extra hole definition and editing is possible.

Rectangular and polygon based individual placements are supported.

## OVERVIEW OF THE FEATURES

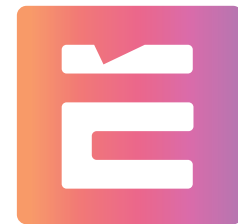

- ✓ Free texture, tile size and listing name definition
- ✓ Wall and floor polygon handling
- ✓ Door and window edges are supported
- ✓ Individual and complete row editing in one step
- ✓ Extra hole definition and editing
- ✓ Rectangular and polygon based individual placement
